

# WATER-INFLATED BARRIERS:

## FOR CIVIL CONSTRUCTION COFFERDAMS AND FLOOD MITIGATION

PART NO.	LENGTH	WIDTH	DRY WEIGHT
TD2450	50'	5'	130lbs
TD3650	50'	7.5'	205lbs
TD4850	50'	10'	255lbs
TD6050	50'	12.5'	320lbs
TD7250	50'	15.75'	405lbs
TD9650	50'	20.5'	520lbs

- △ The Triple Dam features two internal stabilizing panels to provide safety and stability for all sizes from 3' (0.9m) to up to 8' (2.4m) high.
- △ Water-inflated dams are quickly deployed, filled with any available source of water, and are very friendly where environmental impact is a concern.
- △ Triple Dams are reusable, provide flexible layout options, do no substrate damage, and are suitable for worksite dewatering and flood protection in waters up to 6' (1.8m) deep.
